

What is the Magic Briefcase?

The Magic Briefcase is a folder that SugarSync creates on your computer for quick and easy synchronization. The Magic Briefcase is created in your computer's Documents folder when you [install the SugarSync Manager](#).

Files that you drag into the Magic Briefcase will automatically synchronize to the cloud and all of your computers that are running SugarSync. Changes that you make to the files (edits, additions, deletions) are also synchronized, keeping all of your computers up-to-date.

If you don't want to use the Magic Briefcase folder, you can set up any of your own folders to sync to SugarSync and your other computers. [Learn more](#).
